Technical Standards

Orange County EMT's Paramedic Program is a comprehensive, intense program that places specific requirements and demands on the students enrolled in the program. The mission of the program is to provide students with the tools and structure needed to develop basic and advanced skills to provide medical care to individuals in a variety of settings. All policies and procedures found in the course catalog and syllabus must be met along with the expectations listed below. If a student is unable to meet the technical standards of the program with or without reasonable accommodation, the student will not be enrolled in the course, nor will they be able to complete it. Meeting the program's technical standards does not guarantee a student's eligibility for the NREMT or state certification exam.

Students enrolled in the Paramedic Program must demonstrate:

1. Students must demonstrate the following values at all times:
 - a) Integrity
 - b) Trust
 - c) Professionalism
2. The mental ability to think clearly and act decisively during emergency situations.
3. The ability to use proper body mechanics, motor control, sensory function, and have the coordination to perform physical examinations using accepted techniques. Students must have the hand and eye coordination needed to safely perform technical skills on patients.
4. Students must have ability to communicate effectively to all patients regardless of age, gender, or ethnicity, including colleagues and individuals from different cultural and social backgrounds. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
5. Students must have the ability to document patient reports accurately, using proper English, and have the ability to calculate medication dosages using the appropriate math equations.
6. Students must have the ability to accept positive criticism and have a willingness to learn from their mistakes. Students must work as a team member and be committed to serving the community to the best of their ability.
7. Students must have the ability to be flexible and operate in dynamic environments, while always being a patient advocate, regardless of circumstances.
8. Students must have the physical strength to lift and carry patients any varying circumstances that includes up and down stairs.
9. Students will work in potentially dangerous environments and have the forethought to utilize proper Personal Protective Equipment and have the ability to expect the unexpected.
10. Students must display a command presence when working as a team leader, have the ability to maintain scene control, and have the knowledge and ability to order proper resources when needed.

Orange County EMT students are required to meet the technical standards of the program or be able to meet them with certain accommodations. If a student can meet the technical standards with accommodation, Orange County EMT will determine if the accommodation is appropriate. This is achieved by evaluating whether or not the request is reasonable, accounting for patient safety, the educational process of the student and institution, and whether or not it will be permitted during the clinical and field internship.
